INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/JP2004/008790

Box	No. I Basis of the report
1.	With regard to the language, this report is based on the international application in the language in which it was filed, unless otherwise indicated under this item.
	This report is based on translations from the original language into the following language which is the language of a translation furnished for the purposes of:
	international search (Rule 12.3 and 23.1(b))
	publication of the international application (Rule 12.4)
	international preliminary examination (Rule 55.2 and/or 55.3)
2.	With regard to the elements of the international application, this report is based on (replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report):
	the international application as originally filed/furnished
	the description:
	pages as originally filed/furnished
	pages* received by this Authority on
	pages* received by this Authority on
	the claims:
	nos as originally filed/furnished
	nos.* as amended (together with any statement) under Article 19
	nos.* received by this Authority on
	nos.* received by this Authority on
	the drawings:
	sheets as originally filed/furnished
1	sheets* received by this Authority on
	a sequence listing and/or any related table(s) – see Supplemental Box Relating to Sequence Listing.
3.	The amendments have resulted in the cancellation of:
	the description, pages
	the claims, nos.
	the drawings, sheets/figs
1	the sequence listing (specify):
	any table(s) related to sequence listing (specify):
4.	This report has been established as if (some of) the amendments annexed to this report and listed below had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).
	the description, pages
	the claims, nos.
	the drawings, sheets/figs
	the sequence listing (specify):
	If item 4 applies, some or all of those sheets may be marked "superseded."

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/JP2004/008790

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement					
1.	Statement	•	•		
	Novelty (N)	Claims	1-22	YES
			Claims		NO
Inventive step (IS)		Claims		YES	
			Claims	1-22	NO
	Industrial	applicability (IA)	Claims	1-22	YES
			Claims		NO
l					

- 2. Citations and explanations (Rule 70.7)
 - Document 1: WO 03/042401 A2 (Clontech Laboratories Inc.), 22 May 2003
 - Document 2: WO 03/033693 A1 (The Institute of Physical and Chemical Research), 24 April 2003

Claims 1, 8 to 10 and 12 to 18

The inventions set forth in claims 1, 8 to 10 and 12 to 18 do not involve an inventive step in the light of document 1 cited in the international search report.

Document 1 discloses the fluorescent protein mcavGFP2, which comprises a 234 acid-long amino acid sequence that is derived from the species Montastraea cavernosa (refer to fig. 20, SEQ ID NO: 26), and a fluorescent protein mannFP, which comprises a 224 acid-long amino acid sequence that is derived from the species Montastraea annularis (refer to fig. 21, SEQ ID NO: 28), and said fluorescent proteins have a homology of 83% and 77%, respectively, in relation to the amino acid sequence of the fluorescent protein derived from the species Favia favus, which is represented by SEQ ID NO: 1 set forth in the present application.

However, the genus *Montastraea* and the genus *Favia* both belong to the same family (i.e. the family

Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Faviidae); therefore, it can be considered to have been easy to clone the gene which codes the fluorescent protein that is represented by SEQ ID NO: 1 set forth in the present application by creating a degenerate primer or probe based on the sequence information that is disclosed in document 1 and then searching the cDNA library from the species Favia favus.

Claims 1, 8 to 10 and 12 to 18

The inventions set forth in claims 1, 8 to 10 and 12 to 18 do not involve an inventive step in the light of document 2 cited in the international search report.

Document 2 discloses a fluorescent protein, which comprises a 225 acid-long amino acid sequence that is derived from the species *Galaxea fascicularis* (refer to sequence 1), and said amino acid sequence has a homology of 76% in relation to the amino acid sequence of the fluorescent protein derived from the species *Favia favus*, which is represented by SEQ ID NO: 1 set forth in the present application.

However, the species Galaxea fascicularis and the species Favia favus belong to the same order (i.e. the order scleractinia); therefore, it can be considered to have been easy to clone the gene which codes the fluorescent protein that is represented by SEQ ID NO: 1 set forth in the present application by creating a degenerate primer or probe based on the sequence information that is disclosed in document 2 and then searching the cDNA library from the species Favia favus.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/JP2004/008790

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Claims 2 to 8 and 11 to 22

The inventions set forth in claims 2 to 8 and 11 to 22 do not involve an inventive step in the light of documents 1 and 2 cited in the international search report.

Documents 1 an 2 indicate that it is possible to change the hue of the fluorescent light by modifying the amino acid sequence of the acquired fluorescent protein so as to change the green chromophore group.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/JP2004/008790

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

With regards to the modified proteins obtained by modifying the fluorescent proteins that are set forth in claims 2 to 8 and 11 to 22, the present application does not present any experimental data confirming that said modified proteins exhibit a superior effect in comparison to the natural proteins that are represented by SEQ ID NO: 1; therefore, the modified proteins in question cannot be considered to be fully supported by the description.

PCT/JP2004/008790

Supplemental Box Relating to Sequence Listing						
Continuation of Box No. I, item 2:						
1.	With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this report was established on the basis of:					
	a. type of material					
	a sequence listing					
	table(s) related to the sequence listing					
	b. format of material					
	in written format					
	in computer readable form					
	c. time of filing/furnishing					
	contained in the international application as filed					
	filed together with the international application in computer readable form					
	furnished subsequently to this Authority for the purposes of search and/or examination					
	received by this Authority as an amendment* on					
2.	In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.					
3.	Additional comments:					
Ì						
1						
İ						
*	If item 4 in Box No. I applies, the listing and/or table(s) related thereto, which form part of the basis of the report, may be marked "superseded."
